Summary of the pros and cons of rooftop solar

Why should you install solar panels on your roof?

The solar panels will work as a protective shield and increase the lifespan of your roof. Improved energy production:Installing solar panels on the roof ensures abundant sun exposure throughout the day. This tends to produce more energy or improve the energy production process. Ultimately, it cuts the electricity cost and better investment return.

Are roof-mount solar panels a good choice?

Roof-mount solar panels are an excellent choice, as they can be easily installed on the roofs of houses or commercial buildings. The solar racking is directly mounted on the roof surface, securing the solar photovoltaic (PV) panels and absorbing the sunlight to generate energy.

Do solar panels need a slanted roof?

You have to position solar panels properly to achieve the highest energy production. The optimal orientation and angle usually require a slanted roofthat faces the sun. Some roofs have a unique shape that might not accommodate rigid, flat panels. For those homes, flexible solar panels can be a good workaround.

What is the difference between ground-mounted solar panels and rooftop solar panels?

The mounting structure is the basic difference between ground-mounted solar panels and rooftop solar panels. Contrary to solar rooftop panels, ground-mounted solar panels are installed on the ground using various tools such as pipes, tubing, or poles that are required to hold the panel on the ground.

Should you install a solar roof or a ground-mounted solar panel?

If you have limited space and low investment cost, solar rooftop panelsare great to install. On the other hand, ground-mounted solar panels are best for people who have more space and want more environmental benefits. However, going solar should be everyone's priority to make a healthier and greener future.

Is rooftop solar better than natural gas?

In terms of lifecycle emissions -- including manufacturing, operation, and end-of-life processes -- rooftop solar is around 12 times cleaner than natural gas and 20 times cleaner than coal. Rooftop solar is not only a means of drastically reducing carbon emissions, it has other environmental benefits as well.
