

How does La solar work?

LA Solar works with the fully automated production technology of Smartwire connections of the popular Swiss company Meyer Burger, which ensures high efficiency of solar systems and environmentally friendly production solutions. Includes modules with power up to 670 W with solar efficiency of ~ 21.6% both in standard and separate technology.

Can a nanosecond laser cut solar cells?

Using the nanosecond laser Metsolar is able to cut the polycrystalline and monocrystalline solar cells into any desired shape and size. Cutting of solar cells are usually required to achieve desired solar module voltage options.

What's new at 3s Swiss solar?

Ribbon-cutting ceremony at 3S Swiss Solar's new factory in Worb. Image by: 3S Swiss Solar Solutions AG. 3S Swiss Solar Solutions AG has officially opened its second photovoltaic (PV) module production facility in its home country, with the expectation to start first deliveries from the site at the end of the month.

Why do you need to cut solar cells?

Cutting of solar cells are usually required to achieve desired solar module voltage options. Precision and experience in this field allows us to provide very customized module power characteristics for various solar applications from lighting to providing energy source to tiny solar products. Let's discuss your project!

What is 3S Swiss solar solutions' megaslate II?

3S Swiss Solar Solutions' flagship product is MegaSlate II, which comes in a range of colors and finishes including a matte or satin finish. "It is well suited for historical buildings [offering] the possibility of seamless homogenous surfaces.

P-type PERC cell; 12BB Half-cut technology; ... Private rooftop installation. Commercial and Industrial. Ground-mounted solar power plants. TECHNICAL DATA. Power classes. Up 460 to 480 Wp Efficiency. Up to 22.24% Size. 1903 x 1134 x 35 mm Weight. Up to 23.8 kg ... COPYRIGHT @ 2025 SWISS SOLAR AG ALL RIGHTS RESERVED.

The Swiss solar maker is diverting production equipment from Germany to the US to build a new solar cell factory in Colorado instead. The Biden administration's Inflation Reduction Act (IRA) has ...

(Bloomberg) -- Swiss solar panel maker Meyer Burger Technology AG wants to start operations in the US this year after a flood of cheap products from China forced it to close one of Europe's ...

3S Swiss Solar Solutions, a PV module manufacturing company based in Gwatt, Switzerland, has opened its

second manufacturing facility in Worb bei Bern, in the Bern-Mittelland administrative ...

Known for its expertise in solar technology, Meyer Burger has previously partnered with CSEM and EPFL to install over 2,000 advanced solar panels on the roof of Dixi Polytool's factory in Le Locle, demonstrating its commitment to innovative and sustainable energy solutions. The new partnership with Solestial extends Meyer Burger's influence into the space ...

P-type PERC cell; 12BB Half-cut technology; ... Private rooftop installation. Commercial and Industrial. Ground-mounted solar power plants. TECHNICAL DATA. Power classes. 520, 525, 530 Wp Efficiency. Up to 22.32% Size. 2094 x 1134 x 35 mm Weight. Up to 25.5 kg ... COPYRIGHT @ 2025 SWISS SOLAR AG ALL RIGHTS RESERVED.

P-type PERC cell; 9BB Half-cut technology; Color back sheet - white; 21,02% module efficiency; largest cell size (182&#215;91) IDEAL FOR. Private rooftop installation. Commercial and Industrial. Ground-mounted solar power plants. ...

P-type PERC cell; 9BB Half-cut technology; Color back sheet - black; 21.09% module efficiency; largest cell size (182&#215;91) IDEAL FOR. Private rooftop installation. Commercial and ...

Indoor solar cell developer, Perovskia Solar, is setting up a factory in Switzerland that may reportedly print 1 million of its custom-designed perovskite devices annually. It targets the market ...

In Bitterfeld-Wolfen, a solar cell plant opened in 2021 by the Swiss group Meyer Burger on the site of defunct German producer Q-Cells is a sign of a possible renaissance. &quot;We managed to recruit a number of former employees in the sector, and we are benefitting from their know-how,&quot; the director of the Meyer Burger factory, Jochen Fritsche ...

Meyer Burger, the Swiss solar panel maker, will cut nearly 20% of its global workforce, underlining the tough conditions in the renewable energy sector that is battling cheaper imports from China. The company, which last month halted plans to build a factory in Colorado and delayed publishing its financial results, said it would reduce its workforce from about 1,050 ...

Swiss solar cell and module maker Meyer Burger is to restructure its business in a move that will keep its German cell factory open and a potential technology partner. Meyer ...

Our present Swiss Solar products are based on innovative technologies: we produce only monocrystalline modules; since 2020, we have been producing them only using PERC ...

Dlaczego SWISS SOLAR AG. ... TECHNOLOGIA HALF CELL. Nowe moduły IBEX 120MHC-BLK firmy SWISS SOLAR przekonują wyjątkowym wyglądem i szczeg&#243;lnie wysoka wydajnością na małej powierzchni dzięki innowacyjnej konstrukcji. Moduły zmontowane z p&#243;l ogniwami nie tylko generują

wieksza moc wyjściowa, ale także lepiej sprawdzają się w ...

Using the nanosecond laser Metsolar is able to cut the polycrystalline and monocrystalline solar cells into any desired shape and size. Cutting of solar cells are usually required to achieve desired solar module voltage options.

10 Swiss Solar Prizes were awarded to an influential figure, an institution and the people behind solar projects. Among the standout winners in this year's edition were projects that integrate cutting-edge technology with sustainable practices, making a strong case for the growing role of solar power in the Swiss energy transition.
