

The case for dealing with solar trade frictions

Are US and China negotiating a trade dispute in solar photovoltaics?

While the US and China cooperated in renewable energy development, since 2011 the countries have engaged in a protracted and major trade dispute in the solar photovoltaics industry.

What is the solar PV trade dispute?

Historically, renewable energy industries formed unified advocacy coalitions (Meckling et al., 2015). An important feature of the solar PV trade dispute, however, is the division of the solar industry into protectionist and free trade advocacy coalitions in response to the rise in imports from China.

Why is the solar panel Anti-Dumping case a major trade dispute?

Therefore, the escalation of the solar panel anti-dumping case into a major trade dispute, which highlighted both the possible contradiction between the promotion of strategic industrial interests and the pursuit of common global climate goals, and the inadequacy of trade law to resolve it, attracted unprecedented attention.

How did the solar panel trade defence case turn into a political battle?

The solar panel trade defence case turned into a wider political battle when several Member States confronted the European Commission over its proposals as to how to solve these disputes.

Why did the EU and China dispute over solar panels?

The dispute between the EU and China regarding the trade in solar panels has been commonly explained in terms of power politics, whereby a mercantile China exploited European internal divisions to its advantage. But the trade defence case was also criticized for running against European climate policy goals.

What is the US-China solar dispute?

The US-China solar dispute is thus the outcome of competition between protectionist and free trade coalitions of firms and policymakers within a given institutional setting. The structure of US trade law supported the influence of the protectionist alliance.

The study (1) enriches the research related to the economic consequences of international trade frictions, (2) expands the category of theoretical research on the connotation of enterprise competitiveness by integrating two types of enterprise competitiveness elements--environment and resources--into the same research framework, (3) expands the ...
