Asus software is dumb and that update comes up each time the machine gets reformatted, however it does not appear to ever flash more than once. There also seems to be no way to force it to reflash. I may be able to give you a link to download it since I grabbed a copy of it last time I reformatted, but I'm not sure it will help in any way.

Energy storage charging pile refers to the energy storage battery of different capacities added according to the practical need in the traditional charging pilebox. Because the required parameters

Convenient: SOC light indicator function, real-time monitoring machine running status. ... Among them, the use of wind power photovoltaic energy storage charging pile scheme has realized the low carbon power supply of the whole service area and ensured the use of 50% green power. At the same time, through the purchase of green electricity and ...

If the power supply is normal, try restarting the charging pile. If the display screen is still not lighting up, it might be a screen fault or a loose connection.
