

The outer skin of the new energy battery is scratched

Is it safe to use a scratched battery?

Those batteries are unsafe to use if the covering is scratched off. They can short out and go into thermal runaway (VERY bad). As Izan mentioned you can buy shrink wrap covers to re-wrap it. FastTech has some really cheap but it takes a long time to get them from China. I'd buy a few with ASAP shipping, then stock up from FastTech.

Do batteries have to look similar to function?

Batteries do not have to LOOK similar to function. DO NOT TRY TO REMOVE THAT WHITE CAP, you will ruin the battery. Put them in the device as is and it should work fine. And no water usage on the batteries please. adhesive is another word for glue. Under no circumstance is it required or wise to remove the labelling of a battery.

Is the battery casing punctured?

Yes its casing is not punctured. Cover it with tape and keep a closer look on it the first time you charge/discharge. I would still use it. What level of risk you are willing to accept is up to you. Thanks for answering, the casing is not punctured, Do you know how strong is the metal casing? I will use the cells to make a power bank. Be very careful!

What happens if a battery is punctured?

If it's a puncture then it is possible some electrolyte fluid escaped /evaporated which will lower the capacity of the battery. Anyway, I would just replace the battery. Not the answer you're looking for? Browse other questions tagged or .
