This version of the MHP50 comes with a heating plate made from brass (MHP50-B5). A built-in high-speed fan ensures accurate and even heat dissipation. Benefiting from a nano-ceramic coating, the heating plate is easy to clean. ...

The result? A LiFePO4 battery that lasts at least 5 times longer, reducing your long-term costs. This 12V 100Ah battery is equipped with advanced smart self-heating technology, ...

I have placed 30\*30cm heating pad in the insulated battery box, then 1mm aluminium plate on it then LFP battery on top of it. Temperature is regulated by simple thermostat, like this. Temp sensor is taped on aluminium plate. This pad heats up a lot and fast (300-400W). So i use setting to start heating at 7C and end at 10C.
