

Does the MCS certificate only apply to solar panels?

While the focus of our article was on solar panels, the MCS covers various renewable energy products, including wind turbines, biomass boilers, and more. How often does an installer need to renew their MCS certification?

What accreditations do solar panels need?

In the case of solar panel installation, certain accreditations come into play for customer service, performance, safety, and product quality. What is the MCS certificate?

Do solar PV installations need to be MCS certified?

Also, the Council of Mortgage Lenders has advised that, as a minimum to avoid the risk of a property being ineligible for a mortgage, both new and existing Solar PV installations must be MCS certified. All renewable energy products are examined by certification bodies against MCS manufacturing and testing standards.

Are solar panels MCS accredited?

Unlike the Gas Safe Register, solar panel installers and suppliers are not required by law to be MCS accredited. Instead, the scheme rewards suppliers, installers, and products with a certificate if they meet a certain standard - reassuring customers that the product and service they're investing in will be of a good quality.

Why should I get an MCS-certified solar panel?

An MCS-certified solar panel is made with high-quality materials, and performs to a certain standard. That's why it's a good idea to get an accredited panel if you're considering getting a solar panel system, to ensure that the equipment meets good standards of performance.

What certifications do solar panel installers need in the UK?

Beyond MCS certification, several other accreditations are important for solar panel installers in the UK. Here are key certifications you should be aware of: Flexi-Orb: This is a new certification scheme recognised by the United Kingdom Accreditation Service (UKAS).
