Is solar energy inefficient and unreliable?

For a country that already uses too much water for farmers, it is nearly impossible to use that much amount of water to produce solar energy. Considering the above-mentioned disadvantages of solar energy, it is safe to say solar energy is inefficient and unreliable.

Energy generation occurs with solar panels. They trap the sunlight and transform the solar energy into DC power. Energy Storage Once the DC power is generated, there are two routes. Energy storage is done directly through solar batteries. Energy conversion from DC to AC and appliance operations. Energy Discharge

In this article, we'll talk about the 7 disadvantages of solar energy so you can understand why this kind of energy isn't right for everyone. However, renewable energy also has many disadvantages.
