

What is a car battery sticker?

Car battery stickers are used to identify the grade of the battery in your vehicle. The words, codes, and numbers on the sticker contain important information that tells the life of your car's battery, how old it is, and how it will perform. They are one of the most important things to know if you plan to buy a car or sell your used vehicle.

What does a battery date sticker mean?

These stickers indicate when the battery went into service. In other words, it doesn't have to do anything with the manufacture date, but it means when you started using the battery. That's why the battery date sticker will be marked immediately after you purchase it. And you will find that the date is saying something like "in-service date."

What does a round sticker on a battery mean?

Round Sticker Apart from a rectangular date sticker on the battery, you might also see a round sticker that indicates the battery's manufacturing date. It includes numbers and, in some cases, can also include characters. For example, a battery showing 3/17 means the battery was manufactured in March 2017.

Where is the battery in service sticker on a car?

Battery In-Service Sticker Usually, the date stickers are found on the top of the car battery. However, the location can differ depending on your manufacturer. These stickers show when the battery went into service.

What is a typical battery life sticker?

Another typical battery life sticker is round, using either numbers or letters to show the manufacture date. If only numbers are used, it is obvious. A sticker showing 2/07, for example, shows a battery manufactured in February 2007. Sometimes letters are used for the month.

How do I know if my car battery has a date code?

The battery date codes come in different forms and sometimes in different locations : Depending on your manufacturer, you might see some date stickers on top of the car battery. These stickers indicate when the battery went into service.
