

What to do if the solar power supply is not very bright

What if solar panel is not getting sun light?

If solar panel not getting the required sun light than the LED won't work or can't produce the brightest light as you would have expected. Make sure you place your light at a location where it gets direct sun light.

Why are my solar lights not bright?

If you find that your solar lights are not as bright as they used to be, try changing the angle of the solar panel. Sometimes a slight adjustment can make all the difference.

How do you light a solar panel?

If your panel is on a dark wall which soaks up the precious commodity of light the most, consider adding a reflector around it that bounces the light back towards the panel. Think about channeling light into the panel as if it is like adding fuel to a car. Spraying gas all over the car will see very little go into the tank, so it is with light too.

How do I know if my solar light battery is bad?

Most solar lights have a little sensor to check darkness. Make sure you check them during the night time and/or simulate the darkness by covering the sensor with your hand, cloth or something, after covering it if the light turn ON, then it's fine. If they don't, then solar light battery needs to be changed. 4.

How do you clean a solar light?

Use a soft cloth to clean the panel and remove any dirt or debris. We have a full article on how to clean a solar lights check it out. Solar lighting installed outside and exposed to the elements will build up grime over the lens, causing a filtering of the light through a layer of dirt. The fix is a good old Windex and paper towel.

Why is my solar garden light not working?

Most of the outdoor solar garden lights come with ON/OFF button, and that button needs to be turned ON. In many cases this simple thing is ignored by many people and this is one of the main reasons why your solar light isn't working as expected. There might also be a factory defect and the light doesn't turn ON. 2.
