

Which brand of solar mixing valve is good

What is a solar rated mixing valve?

Inta's solar rated mixing valves are designed to reduce the temperature of solar heated domestic hot water to safe, usable temperatures for the end user.

What is a solar thermostatic mixing valve?

The Solar Thermostatic Mixing Valve is designed to reduce the water temperature to a safer level. Unlike the under basin, or bath/shower types we are familiar with, the solar Thermostatic Mixing Valve is designed to function continuously at high temperatures, something a standard TMV cannot cope with.

What is a 22mm mixing valve?

This Intatec Solar 22mm thermostatic solar rated mixing valve works to reduce the temperature of solar heated domestic hot water to ensure safe, scald-free use. Specifically designed to function with a constant high temperature hot water supply, this valve is ideal for use alongside domestic hot water cylinders.

How does the intatec solar 22mm mixing valve work?

Image shown for illustration purposes only. This Intatec Solar 22mm thermostatic solar rated mixing valve works to reduce the temperature of solar heated domestic hot water to ensure safe, scald-free use.

What types of solar thermal valves are available?

That's why we ensured our range of solar thermal valves has every type of valve you could possibly need. Our range of top-quality solar thermal valves includes thermal balancing valves, thermal relief valves, thermal mixing valves, and many more.

Do solar thermal water heating systems need valves?

Like in any other traditional heating system, valves are an essential component in solar thermal water heating systems too. That's why we ensured our range of solar thermal valves has every type of valve you could possibly need.

Discover our 3 Way Thermostatic Mixing Valve with external thread brass design, perfect for solar water heaters. High quality and reliable performance.

Inta's solar rated mixing valves are designed to reduce the temperature of solar heated domestic hot water to safe, usable temperatures for the end user.
