These have been available since January 2022 and they have a battery efficiency of 245 Wh per mile. 2. Fiat 500 Electric Next, we have Fiat, an Italian car manufacturer and its 500 electric model shares the second spot for the most efficient EV batteries.

Which EV battery has the most miles?

The Tesla Model 3 and Volkswagen ID.7 may be leading the executive EV battery race, but the Mercedes EQE 350+ isn't too far behind with up to 429 miles available from its 91kWh battery pack.

How efficient is a car battery?

Its battery efficiency is 258 Wh per mile, just slightly behind second-placed Peugeot and Fiat. All cars, electric or petrol, need to be repaired now and again, but ideally, you'd want repairs to come up as little as possible.

Do electric cars have range anxiety?

Since electric cars were adopted into the mainstream around a half decade ago, range anxiety has largely been consigned to the bin of automotive history. Car makers develop bigger batteries and more efficient designs each year that mean the longest range EVs can now cover far greater distances than cars from even five years ago.

Why do electric cars use lithium batteries?

As lithium battery cells are produced in growing quantities, and research into improving them continues, they're becoming cheaper and more energy dense. These changes mean the batteries powering our electric vehicles hold more kilowatt-hours (kWh) of energy and are achieving longer ranges per charge, making them more practical for more people.

It's great at being an electric car too, with the choice of two battery packs: a 58kWh; or a 72kWh battery. These offer 238 miles and 298 miles respectively. The IONIQ 5 is also clever in that it can charge other things using its charge ...
