As low-cost and safe aqueous battery systems, lead-acid batteries have carved out a dominant position for a long time since 1859 and still occupy more than half of the global battery market [3, 4]. However, traditional lead-acid batteries usually suffer from low energy density, limited lifespan, and toxicity of lead [5, 6].

First National Battery is the leading lead acid battery manufacturer in South Africa, producing over 2.2 million batteries a year. Our batteries are used in more than 40 countries and our products cover various industries and applications ranging from mining, railway and renewable energy to surface traction, telecommunications and automotive (including industrial, commercial and ...

The formation of cured lead/acid battery plates containing a high level (~ 70 wt.%) of tetrabasic lead sulfate ($4\text{PbO} \cdot \text{PbSO}_4$ 4BS) has been studied under both cyclic ...

A novel process was studied to recover lead as ultra-fine lead oxide from lead paste. The desulphurization rate of lead paste was 99.0% with Na_2CO_3 , NaHCO_3 or $(\text{NH}_4)_2\text{CO}_3$. Around 98% of lead from desulphurized paste was converted to lead citrate precursor. Ultra-fine lead oxide with particle size of 100-500 nm could be obtained at 370 °C.

In this article, we'll cover the four basic components of lead-acid battery maintenance: Battery Watering; Planned Scheduled Maintenance Servicing; Charger Compatibility and Configuration; Battery Washing; Lead ...
