

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

Should you put solar panels on your roof?

Like any new piece of technology, there are downsides to having solar panels on your roof, but the benefits massively outweigh them. Solar panels can be expensive, their performance is subject to the weather, they don't work at night, and they don't break even for more than a decade - but electricity from the grid never breaks even.
