

Panel solar energy maintenance every few years

How often should solar panels be maintained?

It takes all the hassle out of owning solar panels. If you don't have a maintenance support package from an installer, you should consider arranging for an intermediate maintenance visit from an MCS contractor every 10 years, and a full maintenance visit every 15 years.

How long do solar panels last?

Solar panels are low maintenance and last up to 30 years? They should be gently cleaned with water every five years? Solar panels should be professionally serviced every 5-10 years. Solar panels can last roughly 30 years with little-to-no maintenance, which means they're a great investment and won't cost you much after the initial outlay.

How often do solar & battery systems need maintenance?

Some technical experts in the industry estimate that a solar & battery system will need three maintenance call-outs across a 20-year period - one for the panels, one for the battery, and one for the inverter. Solar panels also require cleaning every few years in order to get rid of dirt and debris.

How often should solar panels be inspected?

The Microgeneration Certification Scheme (MCS) recommends having an 'intermediate maintenance' inspection of your solar panels from a certified contractor every 10 years, and a 'full maintenance' inspection every 15 years. However, you can avoid the need for external solar inspections by getting yourself a solar panel maintenance support package.

How often should you look after your solar panels?

But if you want to reduce solar panel costs and maintenance over time, you'll need to look after them. Here are a few things that you should do to keep your panels in tip-top condition: We recommend that you get a professional to check over the system at least once every 5-10 years.

How often should a solar panel be replaced?

A maintenance company can track their performance and make recommendations. However, make sure you factor in replacing the inverter and battery every 12 years or so, which can add thousands of pounds to the overall cost - particularly if your panels last the full 40 years.
