They are also referred to as integrated solar panels. How do photovoltaic roof tiles work?

Can solar panels be installed on a roof?

Some models are actual roof tiles with integrated solar cells. Because traditional solar panels are quite bulky and need to be mounted directly on top of your existing roof, some people are put off by their appearance. They can also contrast with the colour and texture of existing roofing materials, such as clay tiles or natural slates.

Solar shingles, or solar roof tiles, are made of slim photovoltaic (PV) sheets that either overlay or replace the existing shingles on a roof. They absorb sunlight and convert it into electricity.
